DETAILED ACTION

Election/Restrictions

- 1. Applicant's election of Group I in the reply filed on June 15, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
- 2. Newly submitted claim 32 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claim 32 belongs classified with Group III.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 32 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claims 11-21 are withdrawn from further consideration pursuant to 37 CFR
 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/666,735 Page 3

Art Unit: 3627

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 1-10 and 22-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huang et al., US 6,151,582.

Huang discloses a supply chain communication event, e.g. Figs. 1-9, 28, 34, 38, a central hub, e.g. 58, trading partners, e.g. 59-62, and identifiers, e.g. Table 2, and events, e.g. communication between nodes. Huang does not explicitly disclose the term communication event. However, the term communication event does not provide any discernable line of demarcation over Huang. Nonetheless, Official Notice is taken that communication events have been common knowledge in the supply chain art. To have provided such for Huang would have been obvious to one of ordinary skill in the art. The motivation for having provided such would have been to have provided known supply chain architecture method for doing business.

- 6. Further references of interest are noted on the attached PTO-892.
- 7. Applicant's Information Disclosure Statement has been reviewed. Note attached PTO-1449.
